INDEX*

(Note : Numbers in parentheses refer to paragraphs. Thus " 6.211 (2) " indicates the second paragraph of section 6.211.)

A priori
  all inference is, 5.133
  always proves to be something logical, 6.3211
  criterion of such a thought, 3.04
  geometry is, 6.35 (1)
  intuitions, scientific principles as, 6.34
  no part of experience is, 5.634
  possibility of a logical form as, 6.33
  what logic's being, consists in, 5.4731
Accident, none in logic, 2.012
Aesthetics, 6.421 (3)
Affirmation, logical property of, 6.231 (1)
Alphabet, 4.016 (2)
Ambiguity, of " property " and other words, 4.123 (3)
Analysis of propositions, 2.0201, 3.201, 3.25, 4.221 (1)
" Ambulo," a composite proposition, 4,032 (2)
Analytical propositions, 6.11
Application, successive
  defined, 5.2521 (1)
  equivalent to " and so on", 5.2523
Argument
  function cannot be its own, 3.333 (1)
  places, and generality, 4.0411 (2)
Assertion
  and deducibility, 5.124 (1)
  cannot give a sense, 4.064
Assertion sign, meaningless, 4.442 (2)
Atomic facts (*Sachverhalt*)
  are combinations of things, 2.01, 2.03
  are mutually independent, 2.061, 2.062, 4.27 (2)
  number of combinations of, 4.27 (1)
  possible infinity of, 4.2211
  possibility of, 2.012, 2.0124
  possibility of occurrence of things in, 2.0121 (2)
  relation to elementary propositions, 4.21, 4.25
  relation to facts, 2
  relation to propositions, 4.1
  structure of, 2.032
Axiom of Infinity, 5.535 (2, 3)
Axiom of Reducibility, 6.1232, 6.1233

Brackets, their importance, 5.461

Calculation
  not an experiment, 6.2331 (2)
  of logical properties of symbols, 6.126 (1)

* The Editor is indebted to Professor Max Black for providing this Index, which was originally prepared for the use of his students at Cornell University.

Case, the (*der Fall*)
and substance, 2.024
and the world, 1
equated with fact, 2
is existence of atomic facts, 2
Causality: no causal nexus, 5.136, 5.1361
Causality, law of
as limit of the describable, 6.362
cannot be said, 6.36 (2)
is form of a law, 6.32, 6.321, 6.361
Certainty
as limiting case of probability, 5.152 (3)
of truth of tautology, 4.464 (1)
opposed to possibility and impossibility, 4.464 (2)
Clarity: everything can be said and thought clearly, 4.116
Classes, theory of, superfluous in mathematics, 6.031 (1)
Colloquial language. *See* Ordinary language
Colour
a form of objects, 2.0251
logical structure of, 6.3751
" Complex," a formal concept, 4.1272 (7, 8)
Complexes
and definition, 3.24 (4)
given only by descriptions, 3.24 (2)
how perceived, 5.5423
propositions about, in internal relation to a statement about constituents, 3.24 (1)
statements about, analysable, 2.0201
Configuration of objects, 2.0272, 3.21. (*See also* Structure)
Constant: expression as, 3.312 (2)
Contradiction. (*See also* Denial)
defined, 4.46 (4)
limiting case of combination of symbols, 4.466 (4)
not a picture of reality, 4.462
shared by propositions, 5.143
Correspondence
between objects and picture elements, 2.13
of configuration of simple signs and objects, 3.21

Darwinian theory, irrelevant to philosophy, 4.1122
Death, 6.431, 6.4311
Deducibility
and identity, 5.141
and obviousness, 5.1363
and relative content, 5.14
and structure, 5.13
relation to form, illustrated, 5.1311 (1)
Definition
as analysis, 3.26
as rule of translation, 3.343
effect upon signification, 3.261 (1)
how symbolized, 4.241 (3)
of a symbol for a complex, 3.24 (4)
of ' complete analysis ' (of proposition), 3.201
of ' contradiction ', 4.46 (4)
of ' expression ', 3.31 (1)
of ' feature ', 4.1221
of ' form ', 2.033
of ' form of an object ', 2.0141
of ' form of representation ', 2.151
of ' formal concept ', 4.126 (1)
of ' formal series ', 4.1252 (1)
of ' independent propositions ', 5.152 (1)
of ' logical picture ', 2.181
of ' logical place ', 3.41
of ' measure of probability ', 5.15
of ' name ', 3.202

of ' negation ' (in sense of simultaneous denial), 5.5
of ' number ', 6.022 (2)
of numbers, 6.02
of 'operation ', 5.23
of ' propositional sign ', 3.12
of ' propositional variable ', 3.313 (3)
of ' range ', 4.463
of ' sign ', 3.32
of ' simple sign ', 3.201
of ' structure ' (of atomic facts) 2.032
of ' successive application ', 5.2521 (1)
of ' successor ', 4.1252 (4)
of ' tautology ', 4.46 (4)
of ' truth-grounds ', 5.101 (2)
of ' truth-operations ', 5.234
of ' truth-possibilities ', 4.3
only an expedient in presentation, 4.242
rules for, 5.451 (2)
Denial
as determining logical place, 4.0641
by means of what is common to all negation symbols, 5.512 (2)
is an operation, 5.2341 (2)
needs a single definition, 5.451
possibility of, presupposed in affirmation, 5.44 (4)
occurrence of, does not characterize sense, 4.0621 (2)
reverses sense, 5.2341 (3)
Denial, sign of
corresponds to nothing in reality, 4.0621
does not refer to an object, 5.44 (5)
Description
of a fact by a proposition, 4.023 (3)
of an object, 4.023 (4)
of complex, 3.24 (2)
of expressions, 3.33
of propositions, 3.317 (2)
of reality by a proposition, 4.023 (2)
of states of affairs, 3.144
of the world
Descriptions, systems of, 6.341
Distinguishability, 2.02331
" Dynamic models", 4.04 (2)

Ego, the non-psychological, 5.641
Elucidation of primitive signs, 3.263
Equality, meaning of sign of, 6.23 (1)
Equations
as expressing substitutability, 6.24 (2)
characterize a standpoint, 6.2323
not needed to express synonymity, 6.232 (2)
Equiprobability, 5.154 (3)
Essence
and general form of proposition, 5.471
of notation, 3.342
of pictorial nature, 4.013
of propositions, 3.341, 4.027, 4.03, 4.016, 4.5 (2), 5.471
of representation, 4.016
of symbol, 3.341, 3.343, 4.465
of the world, 5.4711
Essential property, of a thing, to be a possible constituent of atomic fact, 2.011
Eternity, 6.4311
Ethics, 6.421, 6.422
Existence
of atomic facts, 2.11, 4.1
of logical place, 3.4
Expedients, in logic, 5.452
Exponent, of an operation, 6.021
Expressions
all that need to be translated, 4.025 (1)

Expressions—*continued*
guarantee existence of the logical place, 3.4
have meaning only in a proposition, 3.314 (1)
presented by a variable, 3.313 (1)
the proposition is a function of them, 3.318
the term defined, 3.31 (1)
External property, 2.01231, 2.0233. (*See also* Internal property)

" Fact ", a formal concept, 4.1272 (7, 8)
Facts (*Tatsache*). (*See also* States of affairs *and* Atomic facts)
and pictures, 2.1, 2.11
compose the world, 1.1, 1.2
existence of, 2
mutual independence of, 1.21
negative, 2.06 (2)
required for expression of sense, 3.142
the world divides into, 1.2
totality of, 1.11
Fate, and the ancients, 6.372 (1)
Feature, explained, 4.1221
Features of symbols, express formal properties, 4.125 (6)
Form. (*See also* Possibility)
and possibility of structure, 2.033
and substance, 2.025
cannot be said to have properties, 4.1241
general, of propositions, 4.5, 5.47
general propositional,
and truth operations, 5.54
is a variable, 4.53
logical, 2.18. (*See also* Prototype)
and variable, 3.315
cannot be represented in proposition, 4.12, 4.121 (1)
how determined by a sign, 3.327
of propositions, 4.0031
of a spot, 4.063
of expressions, 3.31 (4)
shown by substitutability, 6.23 (2)
of functions, 3.333 (2)
of objects, 2.0141, 2.0233, 2.0251
of propositions, 3.311
of reality, 2.18
of representation
defined, 2.151
function of, in pictures, 2.22
is shown forth, 2.172
of the world consists of objects 2.022-3
of values of a variable, 4.1271 (2)
Formal, equated with logical 6.12 (1)
Formal concept
already given with object to which it applies, 4.12721
as primitive idea, 4.12721
characteristics of, 4.126 (5, 7)
defined, 4.126 (1)
examples of, 4.1272 (7, 8)
expressed by variables, 4.126 (8), 4.127
opposed to " proper " concept, 4.126 (2)
questions about existence of, senseless, 4.127
Formal law, as determining formal series, 5.501 (6)
Formal properties
connexion with structure, 5.321
explained, 4.122 (1)
expressed by features of symbols, 4.126 (6)
Formal series
defined, 4.1252 (1)

example of, 4.45 (2)
expression for general term of, 5.2522
general term of, 4.1273 (2)
needs variables, 4.1273
of truth functions, 5.1 (1)
progress from term to term of, 5.252
Freedom of the will, 5.1362 (1)
Frege, 3.143, 3.318, 3.325, 4.063 (1), 4.1272 (8), 4.1273, 4.4431, 5.02 (3), 5.132 (4), 5.42, 5.451, 5.4733 (1), 5.521, 6.1271, 6.232 (1)
Frequency, of occurrence of events, 5.154 (1)
" Function ", a formal concept, 4.1273 (7, 8)
Function
and composition, 5.47 (3)
cannot be its own argument, 3.333, 5.251
cannot present formal concepts, 4.126 (4)
distinct from operation, 5.25 (3)
elementary proposition is a, . of names 4.24 (2)
proposition is a, of names, 3.318, 4.24 (2)
Future, no knowledge of, 6.26311

Generality
accidental, 6.031 (2), 6.1232
concept of, separated from truth-function, 5.521
essential
needed in mathematics, 6.031 (2)
opposed to accidental generality, 6.1232
how shown, 5.1311 (2)
how symbolized, 4.0411
its notation contains a prototype, 3.24 (3), 5.522
symbol for, occurs as an argument, 5.523
symbolism for, makes constants prominent, 5.522
refers to logical prototype, 5.522
Geometrical place, and possibility, 3.411
Geometry, as a priori, 6.35 (1)
God, 6.432, 6.372 (1)
" Green is green ", 3.323 (3)

Hertz, 4.04 (2), 6.361
Hieroglyphic writing, 4.106

Idealists, their explanation of seeing spatial relations, 4.0412
Identity
cannot be asserted, 6.2322
criticism of Russell's definition of, 5.5302
how expressed, 5.53, 5.531, 5.532, 5.5321
not a property, 5.473 (2)
not a relation between objects, 5.5301 (1)
of sign-tokens, 3.203
sign of
dispensable, 5.533, 6.232 (2)
its meaning, 4.241 (2)
Immortality, 6.4312 (1)
Inconceivability, and internality of properties, 4.123
Independence, of propositions, defined, 5.152 (1)
Index (of a name)
explained, 5.02
confused with argument, 5.02 (3)
Induction
as assumption of simplicity, 6.363
has only psychological foundation, 6.3631 (1)

Induction, law of
not a logical law, 6.31
not a priori, 6.31
Inference
is a priori, 5.133
" Laws of ", senseless, 5.132(4)
Internal properties. (*See also* Formal properties)
and features, 4.1221
and inconceivability, 4.123 (1)
and structure, 4.122 (2)
knowledge of, needed for knowledge of objects, 2.01231
of a proposition, describe reality, 4.023 (4)
of possible states of affairs, 4.124 (1), 4.125
their holding is shown, 4.122(4)
Internal relations
and deducibility, 5.131
and definition of formal series, 4.1252 (1)
between structures of propositions, 5.2
equivalent to operations, 5.232
of statement about a complex to a statement about constituents, 3.24 (1)
representation as an instance, 4.014 (1)
Internal similarity, 4.0141
" Is," meanings of, 3.323 (2)

Language (*See also* Ordinary Language)
able to express every sense, 4.022 (1)
as supplying intuition, 6.233
" critique of ", 4.0031
disguises the thought, 4.002 (4)
is totality of propositions, 4.001
limits of my, 5.6
logic of, 4.002 (3), 4.003 (1)
translation of, 3.343
Law of least action, 6.3211
Laws of nature, not explanations, 6.371
Life, the problem of, 6.52, 6.521
Logic. (*See also* Logical propositions)
all is accident outside, 6.3
all questions of, answerable off-hand, 5.551 (1)
and mechanics, 6.342
application of, 5.5521, 5.557
as all-embracing, world reflecting, 5.511
calculation in, 6.121 (1)
cannot cross limits of world, 5.61 (3)
deals with possibilities, 2.0121 (3), 5.555 (3)
every proposition of, its own proof, 6.1265
expedients in, 5.452, 5.511
impossibility of " contradicting ", 3.03-3.032, 5.4731
impossibility of describing the world in, 5.61 (2)
irrelevance of monism and dualism to, 4.128 (2)
is a priori, 5.4541 (2), 5.4731, 5.551 (1)
is transcendental, 6.13 (2)
its propositions are tautologies, 6.1, 6.22
laws of, do not obey further laws, 6.123 (1)
must take care of itself, 5.454 (1)
no classification in, 5.454 (1)
no mistakes possible in, 5.473 (3)
no numbers in, 5.453 (2)
no primitive propositions in, 6.127 (1)
no surprises in, 6.1251
not a natural science, 6.111
not a theory, 6.13 (1)
nothing accidental in, 2.012
of constituents, shown by tautologies, 6.12 (2)

of facts, cannot be represented, 4.0312 (2)
possibility in, 5.473 (2)
precedes every experience, 5.552 (2)
" primitive propositions " of, arbitrary in number, 6.1271
problems of, concrete, 5.5563 (2)
process and result equivalent in, 6.1261
proof in, 6.126 (2-4), 6.1262
propositions of, say nothing, 5.43 (2)
reflects the world, 6.13 (1)
role of postulation in, 6.1223
searches for regularity, 6.3
simplicity of, 5.4541
whole philosophy of, 6.113
why called theory of forms, 6.1224
" zero-method " in, 6.121 (2)
Logical, equated with formal, 6.12 (1)
Logical constants
disappearance of, 5.441
do not represent, 4.0312 (2)
only one of them, 5.47 (4), 5.472
there are none, 5.4
Logical coordinates, as determining logical place, 3.41
Logical forms, are anumerical, 4.128 (1)
Logical grammar, 3.325 (1) (*See also* Logical syntax)
" Logical objects ", there are no, 4.441, 5.4
Logical place (*See also* Logical space)
denial as determining, 4.0641
proposition determines one, 3.42 (1)
relation to propositional sign and logical coordinates, 3.41
Logical properties of propositions, demonstrated by producing tautologies, 6.121
Logical propositions
as forms of a proof, 6.1264 (1)
as modus ponens, 6.1264 (2)
connection with the world of, 6.124
dispensable, 6.122
have a peculiar place among all propositions, 6.112
have equal rank, 6.127 (1)
not confirmable by experience, 6.1222
not distinguished by generality, 6.1231 (1)
present the scaffolding of the world, 6.124
their truth discernible in the symbol, 6.113
" treat " of nothing, 6.124
Logical space (*See also* Logical place)
and the world, 1.13
everything is in, 2.013
facts in, 1.13
given with every proposition, 3.42 (1)
pictures present facts in, 2.11, 2.202
place in, determined by proposition, 3.4
Logical syntax
and rules of translation, 3.344
implies all logical propositions, 6.124
meanings of signs plays no role in, 3.33
need for obeying, 3.325 (1)
rules of, 3.334

Mathematics
has no need for theory of classes, 6.031 (1)
intuition in, place of, 6.233
is a logical method 6.2 (1), 6.234

Mathematics—*continued*
method of, working with equations, 6.2341
no accidental generality in, 6.031 (2)
proof in, significance of, 6.2321
propositions of
all self-evident, 6.2341
are equations, 6.2 (2)
as links in inference, 6.211
express no thoughts, 6.21
show logic of the world, 6.22
uses method of substitution, 6.24 (1)
Mauthner, 4.0031
Mechanics
its generality, 6.3432
nature of, 6.343
relation to logic, 6.342
Microcosm, the, 5.63
Meaning
of names, 3.3
of primitive signs, 3.263
Modus Ponens, 6.1264 (2)
Multiplicity
and number of dimensions of signs, 5.474
and symbol for generality, 4.0411 (3)
cannot be represented, 4.041
the same in the proposition and the state of affairs represented, 4.04
Mystical, the, 6.44, 6.45, 6.522

Names
are primitive signs, 3.26
are simple signs, 3.202
are simple symbols, 4.24 (1)
are unanalysable, 3.26
cannot be defined, 3.261 (2)
cannot express sense, 3.142
dispensable in describing the world, 5.526
elementary proposition a connexion of, 4.22
have meaning only in context of proposition, 3.3
how they occur in propositions, 4.23
index of, 5.02 (1)
no composition essential, 3.3411
resemble points, 3.144 (2)
the " real ", 3.3411
variable, 3.314 (2)
Natural sciences
are the totality of true propositions, 4.11
do not include philosophy, 4.111
Necessity: only *logical* necessity, 6.37
Negation (*See* Denial)
Negation (=Simultaneous denial)
introduced, 5.5
symbolized, 5.502
Newtonian mechanics, 6.341, 6.342 (2)
Nonsense (*Unsinn*)
examples of, 5.5303, 5.5351 (2)
impossible to judge, 5.5422
Nonsensical, logical propositions not, 4.4611
Notation (*See also* Language)
arbitrariness of, 3.342
essence of, 3.342
" Number ", a formal concept, 4.1272 (7, 8)
Number
concept of, 6.022
concept of equality of, 6.1022 (3)
general form of, 6.022 (1), 6.03
Numbers
as exponents of operation, 6.021
definitions of, 6.02
ordered by internal relation, 4.1252 (2)

" Object ", a pseudo-concept, 4.1272 (1)

INDEX

Objects
- and possibility, 2.014
- are colourless, 2.0232
- are referred to by names, 3.203, 3.22
- are simple, 2.02
- are substance of world, 2.021
- are the fixed form of the world, 2.023, 2.026
- as determining bounds of empirical reality, 5.5561 (1)
- can only be named, 3.221
- cannot be asserted, 3.221
- common characteristics of, not shown by similarity of signs, 3.322
- configuration of, 3.21
- form of, 2.0141
- if given, *all* are given, 5.524 (1)
- independence of, 2.0122
- occurrence in atomic facts of, 2.012-2.0123
- possible infinity of, 4.2211
- possibility of connexion with other objects, 2.0121 (4)
- senseless to speak of their existence, 4.1272 (5)
- senseless to speak of their number, 4.1272 (6)

Obviousness, and deducibility, 5.1363

Occam's razor, 3.328, 5.47321 (1)

Operations
- assert nothing, 5.25 (2)
- basis of, 5.21, 5.24 (3), 5.25 (2), 5.251
- can cancel out, 5.253, 5.254
- characterize difference in forms, 5.24 (a), 5.241
- connexion with structure, 5.22, 6.002
- defined, 5.23
- depend upon formal properties, 5.231
- distinct from functions, 5.25 (3)
- examples of, 5.2341 (2)
- exponent of, 6.021
- not relations, 5.42 (1)
- number of basic, depends only on our notation, 5.474
- occurrence of, does not characterize sense, 5.25 (1)
- result of, can be basis of same operations, 5.251
- shown in a variable, 5.24 (1)
- signs for, are punctuations, 5.4611
- successive application of, 5.2521, 5.2523

Ordinary language
- all its propositions completely in order, 5.5563
- ambiguity of, 3.323
- as complicated as the human organism, 4.002 (2)
- needs complicated adjustments, 4.002 (5)

Philosophy
- an activity, not a theory, 4.112 (2)
- and the Darwinian theory, 4.1122
- danger of confusion with psychology, 4.1121 (3)
- demarcates natural science, 4.113
- demarcates the thinkable, 4.114
- displays the speakable, 4.115
- importance of possibility in, 3.3421
- in no special relation to psychology, 4.1121 (1)
- is full of confusions, 3.324
- its object the logical clarification of thoughts, 4.112 (1)
- makes propositions clear, 4.112 (4)
- mostly consists of senseless statements, 4.003
- not a natural science, 4.111
- results in elucidations, 4.112(3)

Philosophy—*continued*
right method of, 6.53
value of questions about purpose of symbolism in, 6.211 (1)
Physical laws, refer to obejcts of the world, 6.3431
Pictures
and logical space, 2.11
are compared with reality, 2.223
are facts, 2.14, 2.141
are models of reality, 2.12, 4.01
form of representation of, 2.15
have form of representation in common with reality, 2.16, 2.171
how linked with reality, 2.151, 2.1511, 2.201, 2.21
include representing relation, 2.1513
logical
are thoughts, 3.
propositions as, 4.03 (3)
the term defined, 2.181
made by us, 2.1
none a priori true, 2.224, 2.225
possibility of, requires substance, 2.0212
propositions are, 4.012
propositions as, of reality, 4.021
represent their sense, 2.221
Possibility, 2.0122-3
and conceivability, 3.02
and form of representation, 2.151
and logic, 2.0121 (3), 5.473 (2)
and logical place, 3.411
and nature of the world, 3.3421
of atomic facts, 2.012, 2.0124
of connexion of things, 2.0121 (4)
of method of symbolizing, 3.3421
of projection, 3.13 (2)
of propositions, 4.0312 (1)
of states of affairs, 2.014, 2.202, 2.203
how shown, 5.525 (2)
of structure is form, 2.033
" Postulation " of " logical truths ", 6.1223
Primitive ideas, formal concepts as, 4.12721
Primitive signs
how their meanings are elucidated, 3.263
names are, 3.26
of logic
as forms of combination, 5.46
need to be justified, 5.45
rules of definition apply to, 5.451 (2)
signify differently from non-primitive signs, 3.261 (2)
Principles, scientific, as a priori intuitions, 6.34
Probability
based on series of truth-functions, 5.1
does not apply to isolated propositions, 5.153
has certainty as a limiting case of, 5.152 (3)
involves general description of propositional form, 5.156 (2)
is a generalization, 5.156 (1)
measure of, defined, 5.15, 5.151
needed in default of certainty, 5.156 (2)
of elementary propositions, 5.152 (2)
proposition
an extract from other propositions, 5.156 (5)
has no special object, 5.1511
relation of experience to, 5.154 (4)
relation to certainty, possibility, impossibility, 4.464 (2)
unit of, 5.155

INDEX

Problems, the deepest, are no problems, 4.003 (3)
Projection
  and translation, 4.0141
  method of, as thought, 3.11 (2)
  possibility of, belongs to proposition, 3.13 (2)
Proof
  in logic, a mechanical expedient, 6.1263
  of significant proposition contrasted with proof in logic, 6.1263
  of twice two, 6.241
Propositional connexion (*Satzverband*), 4.221
Propositional sign
  as determining logical place, 3.41
  cannot contain itself, 3.332
  defined, 3.12
  elements of, 3.2
  essential nature of, 3.1431 (1)
  is a fact, 3.14, 3.143
  relation of, to proposition, 3.12
  sense of, needs no explanation, 4.02, 4.021
  truth table as, 4.44, 4.442 (1)
Propositional variable
  bar symbol for, 5.501
  defined, 3.313 (3)
  determination of values of, 3.316
  expresses a formal concept, 4.126 (8)
  every variable conceivable as, 3.314
  relation to logical form, 3.315
Propositions
  accidental features of, 3.34
  about complexes, 3.24
  all of equal value, 6.4
  always complete pictures, 5.156 (4)
  analysis of, 3.201, 3.25, 4.221 (1)
  and truth possibilities of elementary prepositions, 4.4
  are articulated, 3.141 (2), 3.251, 4.032 (1)
  are compared with reality, 4,05
  are composite, 4.032 (2), 5.5261 (1)
  are descriptions of facts, 4.023 (3)
  are expressions, 3.31 (2)
  are expressions of their truth conditions, 4.431 (2)
  are generalizations of elementary propositions, 4.52
  are pictures of reality, 4.021
  are truth-functions of elementary propositions, 5(1)
  as configurations of objects, 2.0231
  as functions of expressions, 3.318
  as logical pictures, 4.01 (1), 4.03 (3)
  as models of reality, 4.01 (2)
  can say nothing about themselves, 3.332
  cannot assert their own truth, 4.442 (3)
  cannot be given sense by assertion, 4.064
  cannot represent logical form, 4.12 (1), 4.121
  completely generalized, 5.526 (1), 5.5261 (1)
  content of, 3.13 (4)
  denial of, 4.0641
  determine one logical place each, 3.42
  elementary
    are truth-arguments of proposition, 5.01
    assignment of truth-values to, describes the world, 4.26
    cannot be given a priori, 5.5571

Propositions—*continued*
cannot contradict other elementary propositions, 4.211
composition of, cannot be given, 5.55 (2)
concept of, 5.555 (1)
consist of names, 4.22, 5.55 (2)
contain all logical operations, 5.47 (2)
forms of, no hierarchy of, 5.556
if given, *all* are given, 5.524 (2)
importance of, for understanding other propositions, 4.411
how symbolized, 4.24 (2, 3)
logically independent, 5.134
possible forms of, 5.55
purely logical grounds for there being, 5.5562
range allowed by, 5.5262 (1)
relation of truth possibilities of, to other propositions, 4.4
relation to atomic facts, 4.21, 4.25
relation to tautology and contradiction, 6.3751(3)
essential features of, 3.34
expression of thoughts in, 3.2
follow from elementary propositions, 4.52
general form of, 5.47 (5)
have elementary propositions as truth-arguments, 5.01
have sense independent of facts, 4.061
have truth-value because pictures of reality, 4.06
how understood, 4.024
in them names stand for objects, 3.22
logical (*See* Logical propositions)
logical form of, 4.0031
most general form of, 4.5, 6
need only ' yes ' or ' no ' to fix reality, 4.023 (1)
neither probable nor improbable in themselves, 5.153
number of possibilities of agreement with truth-possibilities of elementary propositions, 4.42, 4.45 (1)
opposition of, 5.513 (2)
present existence and non-existence of atomic facts, 4.1
presuppositions of, 5.5151 (3)
" primitive ", 5.43 (1)
probability, have no special object, 5.1511
psychological, 5.541, 5.542
reach through whole logical space, 3.42 (3)
relation of, to propositional sign, 3.12
resemble arrows, 3.144 (2)
say how, not what a thing is, 3.221
sense of, unchanged by adjoining tautology, 4.465
show their sense, 4.022
show what they say, 4.461 (1)
significant
are thoughts, 4
content of, 3.13 (4, 5)
what is common to, illustrated, 5.513 (1)
what they say, 4.022 (2)
what logical space given with, 3.42 (1)
Prototype
and logical form, 3.315
and symbolism for generality, 5.522
and variable, 3.315
examples of, 3.333 (1), 5.5351 (1)
in notation for generality, 3.24 (3), 5.522

INDEX

Pseudo-concept, 4.1272 (1)
proposition and *thing* as, 5.5351 (1)
Pseudo-propositions, 5.535 (1)
arising from use of pseudo-concepts, 4.1272 (4)
mathematical propositions are, 6.2 (2)
Psychology, and philosophy, 4.1121

Range, defined, 4.463
Reality
as existence of atomic facts, 2.06 (1)
completely described by proposition, 4.023 (2)
described by internal properties of proposition, 4.023 (4)
empirical, bounded by totality of objects, 5.5561 (1)
form of, 2.18
how linked to pictures, 2.1511-2.15121
logical features of, 4.023 (5)
not pictured by tautology or contradiction, 4.462
pictures are models of, 2.12
pictures compared with, 2.21, 2.223
proposition as picture of, 4.01 (1), 4.021
propositions are compared with, 4.05
total, is the world, 2.063
Representation, logic of, 4.015 (*See also* Form of representation)
Representing relation, belongs to the picture, 2.1513
Right and left hand, Kantian problem of, 6.36111
Rules, as equivalent to symbols, 5.514
Russell, 3.318, 3.325, 3.331, 3.333 4.0031, 4.12721, 4.1272 (8), 4.1273, 4.241 (3), 5.02 (2), 5.132 (4), 5.252, 5.4, 5.42, 5.452 (2), 5.513 (3), 5.521, 5.525, 5.5302, 5.535, 5.541 (4), 5.5422, 5.553 (1), 6.123 (2), 6.1232
Russell's paradox, 3.333 (4)

Saying
by propositions, 4.022 (2)
impossibility of, what we cannot think, 5.61 (4)
Scaffolding, logical, 3.42 (3), 4.023 (5), 6.124
Scepticism, 6.51 (1)
Self-evidence (*See also* Obviousness)
how discarded in logic, 5.4731
not a criterion of logical propositions, 6.1271
of mathematical propositions, 6.2341
Sense
and deducibility, 5.122
cannot be supplied by assertion, 4.064
characterized by expressions, 3.31 (1)
connexion with method of projection, 3.11 (2)
equated with representation of state of affairs, 4.031 (2)
expressible only by facts, 3.142
new, how communicated, 4.03 (1)
objects occurring in, 4.1211 (1)
of propositional sign, needs no explanation, 4.02, 4.021
of propositions
and possibilities of existence of atomic facts, 4.2
contained in sense of other propositions, 5.122
expressed by spatial position, 3.1431 (2)
form only of, contained in proposition, 3.13 (4)

Sense—*continued*
how determined, 4.063 (2)
independent of facts, 4.061 (1)
of truth-functions as a function, 5.2341 (1)
only propositions have it, 3.3
opposite, 4.0621 (3)
postulate of determinateness of, 3.23
requires substance, 2.0211
reversed by denial, 5.2341 (3)
what a picture represents is its, 2.221
Senseless (*Sinnlos*)
distinct from nonsensical, 4.461 (3), 4.4611
examples of the, 4.1272 (9), 4.1274, 5.1362 (2)
" laws of inference " are, 5.132 (4)
tautology and contradiction are, 4.461 (3)
Series, formal (*See* Formal series)
Showing
by tautologies and contradictions, 4.461 (1)
by structure, 4.1211 (2)
correctness of solipsism, 5.62 (2)
examples of, 4.1211, 6.12, 6.1201, 6.127 (2), 6.36 (2)
excludes saying, 4.1212
generality, 5.1311 (2)
logic of the world, 6.22
logical form, 4.121 (4)
needed for form of representation, 2.172
of operations, 5.24 (1)
of sense, 4,022
that a formal concept applies, 4.126 (3)
that internal properties hold, 4.122 (4)
that one proposition follows from another, 4.1211 (2)
that the world is my world, 5.62 (3)
the inexpressible, 6.522
what it says, by proposition, 4.461 (1)
Sight, field of, 5.633, 5.6331
Sign
and symbol, 3.326
application of, 3.262
as likeness of the signified, 4.012
as perceptible part of symbol, 3.11, 3.32
cannot receive a wrong sense, 5.4732
complex, 3.1432
equivalence of, 5.47321 (2)
how it determines a logical form, 3.327
identity of tokens of, 3.203
possible, 5.473 (2)
primitive (*See* Primitive signs)
propositional (*See* Propositional sign)
simple, 3.201, 3.202
the same, may belong to different symbols, 3.321
unused, 3.328 (1)
Similes, 4.015
Simplicity of objects, 2.02, 2.021
" Socrates is identical ", 5.473 (2), 5.4733 (3)
Solipsism
coincides with realism, 5.64
correct in intention, 5.62
Soul, 5.5421 (*See also* Subject)
Space
a form of objects, 2.0251
congruence in, 6.36111
geometrical figures cannot contradict laws of, 3.032
logical (*See* Logical space)
spatial objects must lie in, 2.0131 (1)
spatial objects unthinkable apart from, 2.0121 (4)
symmetry in, 6.3611 (3)
visual, 2.0131 (2)
" Spatial spectacles ", 4.0412

States of affairs (*Sachlage*)
can be described, not named, 3.144 (1)
connexion of object with, 2.0122
possibility of, 2.014
Structure
and form, 2,033
and internal property, 4.122(2)
connexion with operation, 5.22
logical, 4.014 (2)
logical relations shown by, 4.1211 (2)
of a picture, 2.15 (2)
of atomic fact, 2,032, 2.034
of propositions, and deducibility, 5.13
of propositions, stand in internal relations, 5.2
properties of, and tautology, 6.12 (3)
Subject, the
and the body, 5.631 (2)
does not belong to the world, 5.632
is a limit of the world, 5.632, 5.641 (3)
no such thing exists, 5.542 (1), 5.631 (1)
Substance
of the world, identified with objects, 2.021
exists independently of what is the case, 2.024
is form and content, 2.025
Successor, definition of, 4.1252(4)
Superstition, 5.1361 (2)
Symbolizing, methods of, 3.322
Symbols
and signs, 3.326
as equivalent to rules, 5.541
composite, criterion of, 5.5261 (2)
difference of, 3.323 (3)
different, may have common sign, 3.321
equated with expressions, 3.31
essential features of, 3.34
for complexes, how defined, 3.24 (4)
have sign for perceptible part, 3.32
presuppositions of, 5.5151 (3)
what signifies in, 3.344

Tautology
a limiting case of combinations of symbols, 4.466 (4)
an ungeneralized proposition can be, 6.1231 (2)
and properties of structure, 6.12 (3)
as showing logic of the world, 6.22
defined, 4.46 (4)
derivation of tautology from, 6.126 (3)
effect of adjoining, to a proposition, 4.465
follows from all propositions, 5.142
has no truth conditions, 4.461 (2)
how used in demonstrating logical properties, 6.121
is analytical proposition, 6.11
is without sense, 4.461 (3)
its truth certain, 4.464 (1)
logical proposition is, 6.1
method for recognizing, 6.1203
not a picture of reality, 4.462
not nonsensical, 4.4611
probability of, 5.152 (4)
says nothing, 4.461 (1), 5.142, 6.11
shared by propositions, 5.143 (1)
shows that it is a tautology, 6.127 (2)
Theory of knowledge, how related to psychology and philosophy, 4.1121 (2)
Theory of types, 3.331-3.333, 5.252, 6.123 (2)

Things (*See* Objects)
Thinkable
  and picturable, 3.001
  and possible, 3.02
  is demarcated by philosophy, 4.114
  only uniform connexions are, 6.361
Thought
  a priori, criterion of, 3.04
  as a logical picture, 3
  as method of projection, 3.11 (2)
  contains possibility of a state of affairs, 3.02 (1)
  disguised by language, 4.002(4)
  expressed by signs, 3.1
  form of, 4.002 (4)
  how expressed in propositions, 3.2
  is applied propositional sign, 3.5
  is the significant proposition, 4
Time
  a form of objects, 2.0251
  " passage " of, 6.3611 (1)
  sequence of events in, 6.3611 (1, 2)
  temporal objects unthinkable apart from, 2.0121 (4)
Totality of atomic facts, 2.05
Translation
  and projection, 4.0141
  as criterion for " what is common " to symbols, 3.343
Truth
  and falsity, not coordinate relations, 4.061
  concept of, explained, 4.063
  concept of, Frege's account false, 4.431 (3)
  its connexion with pictorial nature of proposition, 4.06
  not a property, 6.111
Truth-arguments, elementary propositions are, 5.01
Truth-conditions
  groups of, can be ordered in a series, 4.45
  how expressed, 4.442 (4)
  of propositions, and truth possibilities of elementary propositions, 4.41
  symbolism for, 4.43
  relation to truth-possibilities, 4.431 (1)
Truth-functions
  and truth-operations, 5.3 (2, 3)
  are results of operations, 5.234
  can be ordered in series, 5.1 (1)
  general form of, 6 (1)
  not material functions, 5.44 (1)
  notations for, 3.3441
  of two variables, itemized, 5.101 (1)
  result from application of simultaneous denial, 5.5 (1)
  the term introduced, 5.
Truth-grounds
  and deducibility, 5.11, 5.12, 5.121
  as measure of probability, 5.15, 5.151
  defined, 5.101 (2)
Truth-operations
  and truth-functions, 5.3 (2, 3)
  defined, 5.234
Truth-possibilities
  defined, 4.3
  of combinations of elementary propositions, 4.28
  schemata for, 4.31

Understanding
  depends on understanding elementary propositions, 4.411
  of general propositions depends on understanding elementary propositions, 4.411
  of names, 4.243
  of propositions, 4.02, 4.024

of synonyms, 4.243
Unspeakable, the, and philosophy, 4.115

Value, 6.4, 6.41
Variable (*See also* Propositional variable)
an expression presented by, 3.313
is sign of formal concepts, 4.1271
can be regarded as propositional variable, 3.314
determination of values of, 3.317
form of, 4.1271 (2)
general propositional, 5.242
general propositional form is a, 4.53
in expression of general term of series, 5.2522
names, as sign for pseudo-concept, *object*, 4.1272 (1)
name, can be conceived as propositional variable, 3.314 (2)
needed for expressing general term of formal series, 4.1273 (1)
propositional (*See* Propositional variable)
used for operations, 5.24 (1)
values of, 3.315, 5.501 (6)

Whitehead, 5.452 (2), 5.252
Will, the, 6.423, 6.43
Words, cannot occur both in and out of propositions, 2.0122
World, my
I am, 5.63
limits of, 5.62 (3)
World, the
and life are one, 5.621
and logical space, 1.13
and what is the case, 1
completely described by totality of true elementary propositions, 4.26
composed of facts, not things, 1.1
connexion with logical propositions, 6.124
divides into facts, 1.2
independent of my will, 6.373, 6.374
information about, given by simplicity of description, 6.342 (2)
is total reality, 2.063
is totality of atomic facts, 2.04
its form consists of objects, 2.023
limits of, 5.61 (1)
logic of, shown in tautologies and equations, 6.22
logical properties of, 6.12, 6.124
names not needed for description of, 5.526
nature of, revealed by possibility, 3.3421
objects its substance, 2.021
projective relation of propositional sign to, 3.12
sense of, 6.41 (1)
the subject does not belong to it, 5.632

" Zero-method ", in logic, 6.121 (2)

L373
